

Action Plan – SCS3214 / IS3113 Group Project

Group 11

Feedback from the Evaluation Panel

1. Meet and discuss with industry specialists to discuss and overcome practical issues that could arise in the business idea during the development process.
2. Reconsider the scope of the project so that the project can be completed within the ongoing semester.

Action Plan

1. During the proposal presentation, our panelists highlighted that we could meet practical difficulties during the implementation process. In order to overcome such issues, it will be best suited to obtain feedback from people who have experience in the tourism industry as they have more knowledge and exposure on tourism which would be beneficial. Hence, as a team, we will be taking steps to reach out to such personnel like tour guides, hotel managers and taxi services who can share their views on how we could overcome such difficulties that could arise and improve our proposed system to cater our users more effectively and efficiently.

Further, we would seek the support of our group supervisor to obtain his feedback at such junctures. Moreover, he would also connect us with a few industry experts who could provide us more practical insights.

2. In order to reduce the scope of the project,
 - a. we decided to have the chat option as an additional feature instead of it being a main feature and it will be implemented only after the other main features are successfully implemented.
 - b. we will remove any other procedures that have to be discarded as practically unachievable without harming the flow of the system as the project is been implemented.
